

4th Annual Cardiometabolic Risk in Inflammatory Conditions Emerging Insights and Treatment of Inflammation in Cardiovascular Disease

Friday, April 26, 2024

4th Annual Cardiometabolic Risk in Inflammatory Conditions: Emerging Insights and Treatment of Inflammation in Cardiovascular Disease

This course will be offered both in-person and live-streamed online

This one-day course will cover state-of-the-art topics on the management of patients at elevated risk of cardiovascular and cardiometabolic disease due to underlying systemic inflammation. This course is designed to provide an informative and practical guide towards the clinical management across a spectrum of cardiovascular conditions in those with systemic inflammation, who are at risk for accelerated atherosclerosis and with such disease states as recurrent pericarditis, and autoimmune conditions including rheumatoid arthritis, systemic lupus erythematosus, and scleroderma.

The course is meant to be an update into recent data linking systemic inflammation and cardiovascular disease including reviewing current and upcoming clinical trials targeting inflammation to reduce cardiovascular disease. Multimodality imaging is increasingly important to manage cardiovascular disease in those with systemic inflammation and updates will be provided on novel techniques to image the vasculature in vasculitis and to assess cardiovascular risk in general. We will review current updates in the clinical management of cardiovascular complications of such autoimmune conditions as scleroderma, systemic lupus erythematosus, and rheumatoid arthritis. Finally, a series of speakers will discuss practical implications and recent society guidelines on targeting inflammation to treat atherosclerosis risk with such medications as colchicine. The day will end with cases and practical lessons from cardio-rheumatology clinics.

Question and Answer sessions will be spread throughout the day to encourage interaction and audience

participation with interspersed panel discussions from experts describing their own experiences, practical approaches, and lessons learned from cardio-inflammatory clinics.

Course Directors

Michael S. Garshick, MD

Assistant Professor of Medicine and
Dermatology
NYU Grossman School of Medicine
Cardio-Rheumatology Program
Center for the Prevention of Cardiovascular
Disease
New York, NY

Brittany Weber, MD, PhD

Director, Cardio-Rheumatology Clinic
Associate Physician, Cardiology and
Cardiovascular Imaging,
Brigham and Women's Hospital
Assistant Professor of Medicine, Harvard
Medical School
Boston, MA

Hear Clinical Experts Speak on These Hot Topics and More!

- Evolving Concepts on Inflammation and Cardiovascular Disease
- Updates in Cardio-Rheumatology
- Cardiovascular Implications of Autoimmunity in Pregnancy
- Approaches to Treating Pericarditis
- Cardiovascular Complications of Systemic Vasculitis
- Scleroderma and Cardiopulmonary Manifestations

Course Details and Agenda

This course is being organized by NYU Langone's Center for the Prevention of Cardiovascular Disease in collaboration with the Brigham and Women's Hospital.

Endorsed By:

New York
CHAPTER

American College of Cardiology.

Connecticut
